

CATTLE INTERNSHIP **Spring/Summer 2013**

Looking for large animal experience?

Seeking undergraduate interns for dairy cow research

Job Description:

- 10 to 20 hours/week (flexible, *may include some weekends*)
- Study runs from May-September
- Observe cows, record physiological & behavioral measurements
- Move and train animals, help set up equipment, etc.
- Must be comfortable working with cows in hot outdoor conditions
- All training will be provided by the researchers, beginning in April

You will benefit by:

- Gaining hands-on experience with cattle handling, and knowledge about behavioral research and farm animal welfare
- Earning course credit (details to be explained in interview)
