

DEPARTMENT OF ANIMAL SCIENCE

FALL 2009 SEMINAR SERIES

Weir Room 2154 Meyer Hall 12:10pm-1:00pm

<u>DATE</u>	<u>SPEAKER</u>	<u>TITLE</u>
September 28	ANDREW WONG Department of Animal Science, UCD Exit Seminar: Genetics Graduate Group	Two Germ Cell-Driven Site-Specific Recombination Systems for the Genetic Containment of Transgenic Fish
October 5	BRIAN TRAINOR Assistant Professor Department of Psychology, UCD	Is There a Season for Everything? Photoperiod and Physiology in the California Mouse
October 12	KATHRYN RADKE Department of Animal Science, UCD	Update on the Novel H1N1 Influenza Virus
October 19	AL CONLEY Department of Population, Health and Reproduction, UCD	Aromatase and the Evolution of Reproductive Strategies
October 26	JUAN MEDRANO Department of Animal Science, UCD	TBA
November 2	SUSAN SWANBERG Department of Animal Science, UCD	Molecular Mechanisms in Autism Spectrum Disorders
November 9	JIM IRELAND Professor Department of Animal Science Michigan State University	Physiological Significance of the High Variation in Antral Follicle Count during Ovarian Follicular Waves in Young Adult Cattle
November 16	CASSANDRA TUCKER Department of Animal Science, UCD	Behavior and Growth: Cloned Bulls in the First Year of Life
November 23	WYATT DELFINO Department of Animal Science, UCD Exit Seminar: Genetics Graduate Group	Combining Strategies to Increase Gene Targeting Efficiency: Repair Pathway and Template Choice, Repair Pathway and Repair Fidelity
November 30	BOB SAINZ Department of Animal Science, UCD	Modeling Greenhouse Gas Emissions from Beef Cattle in South America
