

**DEPARTMENT OF ANIMAL SCIENCE**  
**FALL 2013 SEMINAR SERIES**  
 Weir Room 2154 Meyer Hall 12:10pm-1:00pm

<u>DATE</u>	<u>SPEAKER</u>	<u>TITLE</u>
September 30	<b>TOM WHEELER</b> Senior Scientist, AgResearch, New Zealand	Proteomic Investigations of Cows' Milk: Insights into its Host Defense Functionality
October 7	<b>ERANDA RAJAPAKSHA</b> UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Effects of Standing Surface Characteristics on Dairy Cow Behavior and Skeletal Muscle Physiology
October 14	<b>ERIN LEGAKI</b> UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Sertoli Cells: What's Androgen got to do with it?
October 21	TBA	
October 28	TBA	
November 4	<b>VICTORIA CUSSEN</b> UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Intraspecific Variation: Implications for Captive Psittacine Welfare
November 11	HOLIDAY	
November 18	<b>CAMILLA BEECH</b> Head of Regulatory Affairs, Oxitec Ltd, UK	Time to Fly: Genetically Modified Insects and Regulatory Challenges
November 25	<b>ASHLEY ROWSON</b> UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Lentiviral Transduction of Pig Mammary Epithelial Cells <i>in vitro</i> and <i>in vivo</i>
December 2	<b>CAITLIN COOPER</b> UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Consumption of Milk Containing Recombinant Lactoferrin and/or Lysozyme has Positive Effects on Intestinal and Systemic Health in Young Pigs
