

DEPARTMENT OF ANIMAL SCIENCE
FALL 2014 SEMINAR SERIES
 Weir Room 2154 Meyer Hall 12:10pm-1:00pm

<u>DATE</u>	<u>SPEAKER</u>	<u>TITLE</u>
October 6	No seminar	
October 13	ANNE FANATICO Assistant Professor, Sustainable Development Dept., Appalachian State University	Alternative Poultry Production in Sustainable Agriculture and Food Systems: A Multi-scale Approach
October 20	ZAC WILLIAMS Postdoctoral Researcher, Department of Poultry Science, Auburn University	The Last Five Years and the Plan for the Next Five Years
October 27	ERIC DELWART Senior Investigator, Blood Systems Research Institute, Adjunct Professor, Dept. Laboratory Medicine, UCSF	Metagenomics and Viral Discovery in Wild and Domesticated Animals
November 3	CLAIRE WADE Professor and Chair of Computational Biology and Animal Genetics, The University of Sydney, Australia	New Insights from Whole Genome Sequencing in Companion Animals
November 10	BECKY BELLONE Visiting Associate Professor, UCD, Dept. of Population Health and Reproduction	Sighting the Genetic Cause of Leopard Complex Spotting and Congenital Stationary Night Blindness in Horses
November 17	LUIS MORAES UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Statistical and Optimization Modeling of Energy Utilization by Cattle
November 24	CARRIE FINNO Assistant Professor, UCD, Dept. of Population Health and Reproduction	Genetics of alpha-Tocopherol Associated Neuroaxonal Dystrophy
December 1	STEVE FRESE Postdoctoral Researcher, UCD, Dept. of Viticulture and Enology	The Evolution of Host Specificity in a Vertebrate Gut Microbe, <i>Lactobacillus reuteri</i> ; Implications for Animal Health
December 8	JILL SODERSTROM HAVLIN UCD, Dept. of Animal Science Exit Seminar: Animal Biology Graduate Group	Niacin Feeding to Fresh Dairy Cows: Immediate and Long-term Effects on Health, Milk Production and Fertility
